State the job title and some responsibilities of at least three people in the clinic:

Rabbit breeder: This person breed the rabbits, kept breeding records and placed nest boxes for the pregnant does.

Veterinarian: This person came in periodically to asses the health of the rabbits. He treated the sick rabbits and outlined prevention methods for the farm manager.

Farm manager: This person was in charge of making sure the farm runs smoothly. She ordered the feed, checked water lines and pumps, ordered materials and equipment.

What are some of the chores that you performed?

I helped wean the rabbits and clean the nest boxes.

I feed the rabbits pellets in the morning and then hay in the afternoon.

I even helped torch a cage!
