

## **Fostering Kits - Activity 3**

### ***Fostering or hand feeding your own rabbits***

After breeding your doe(s) and keeping accurate and constant records on your rabbits you are able to determine how you can apply fostering techniques or hand feeding supplementation to enhance the efficiency of your production and your rabbit's health. Choose to either foster rabbit kits with another doe, or to hand feed your kit(s), depending on your specific situation. As you foster or hand-feed the rabbits keep accurate records on the kits and the doe(s).

What situation are the doe and the kits in? (ex. The doe had too many kits.)

Explain which technique works best for you in this situation.

How many kits will you foster or feed?

From which doe(s)?

### **REFLECT/APPLY**

What was the most difficult part of experience?

How could you improve your technique?

Do you feel confident that you did the best you could?

How will mastering this technique benefit your rabbit production enterprise?
